Opening Address, Xu Xurong xxxiii

Congratulations from
Chinese Scientists, Yan Jici xxxv
the IUPAP, Yang Guozhen xxxvi
the NSFC, Hu Zhaosen xxxvii

In memoriam Solomon Pekar, S. Permogorov xxxix

A brief review of ICL '87, Donald S. McClure xli

Announcement of the ICL '87 Prize Recipient, W.M. Yen xlv

Section 1. Prize Winner's Report

A study of excited state dynamics of rare earth ions in solids by coherent transients and spectral holeburning
Macfarlane, R.M. 3

Section 2. Plenary Session

Spectroscopic studies of luminescent properties of insulators
Yen, W.M. 9

Optical spectroscopy of excitons in quantum wells
Esaki, L., L. Vina, E.E. Mendez and L.L. Chang 12

Section 3. Ferd Williams Symposium

Effects of high pressures on luminescent spectra
Canny, B., J.C. Chervin and D. Curie 19

Color electroluminescence in alkaline-earth sulfide thin-films
Tanaka, S. 20

Electronic states and pair emission in ZnSe
Bhargava, R.N. 24

Section 4. Quantum Well Symposium

Nonlinear optics below the bandedge in GaAs quantum well heterostructures
Zucker, J.E. 31

Optical studies of GaAs quantum wells
Bastard, G. 33

0022-2313/88/$03.50 © Elsevier Science Publishers B.V.
(North-Holland Physics Publishing Division)

Section 5. Invited Papers

Photoluminescence in semimagnetic semiconductors
Gebhardt, W. 39

New aspects of the solvent mode in the photoinduced electron transfer in polar solution
Kakitani, T. 43

A comparative study on ultrafast photonic energy transport in biological antenna and artificial multilayers
Yamazaki, I., N. Tamai and T. Yamazaki 47

Study of the luminescent state of the VO_4^{3-} ion in YVO_4, YPO_4 and $Ba_3(VO_4)_2$ single crystals by EPR with optical detection
Barendswaard, W., R.Th. Weber and J.H. van der Waals 51

Luminescence studies of inertial motion in liquids
Hochstrasser, R.M. 54

Electronic structure of complex defects in semiconductors from luminescence perturbation spectroscopy
Monemar, B. and W.M. Chen 59

Optical nonlinearities and bistabilities in highly photo-excited II–VI compounds
Klingshirn, C., U. Becker, O. Gogolin, M. Kunz, V.G. Lyssenko, F.A. Majumder, D. Oberhauser, R. Renner, M. Rinker, H. Schwab, S. Shevel, H.-E. Swoboda, C. Weber, M. Wegener and A. Witt 64

Four-wave mixing and fluorescence linenarrowing studies of Eu^{3+} ions in glasses
Powell, R.C., F.M. Durville, E.G. Behrens and G.S. Dixon 68

Picosecond time-resolved study of luminescence of $Cd_{1-x}Mn_xTe$
Hayes, W., K.S. Wong, J.F. Ryan and A.K. Ramdas 72

Nonradiative electron-hole recombination through deep centers in semiconductors
Sumi, H. 76

Fractals in luminescence
Blumen, A., J. Klafter and G. Zumofen 80

Magnetic field effects in doped amorphous solids studied by optical hole-burning
Van den Berg, R., H. van der Laan and S. Völker 84

Hole subbands in quantum wells and superlattices
Huang, K., J. Xia, B. Zhu and H. Tang 88

Physics of electroluminescence devices
Muller, G.O., R. Mach 92

A new electroluminescence display device
Pankove, J.I. 97

Section 6. Luminescence of Insulators, Semiconductors and Amorphous Materials

Luminescence from β-Ga_2O_3:Cr^{3+}
Walsh, C.G., J.F. Donegan, T.J. Glynn, G.P. Morgan, G.F. Imbusch and J.P. Remeika 103

Excited-state absorption measurements in the Ni^{2+} doped MgO and MgF_2 vibronic laser systems
Moncorgé, R. and T. Benyattou 105

Sharp line near infrared luminescence from titanium 2 + in magnesium chloride
Jacobsen, S.M., C. Reber and H.U. Güdel 107

F_{2A} centres formation in CaF_2:Na^+
Garcia Tijero, J.M., J. Casas-Gonzalez and F. Jaque 109

Effects of crystal-field-induced level-mixing on luminescence properties of Eu^{3+} in $Ca(PO_3)_2$ glass
Kushida, T. and G. Nishimura 111

Influence of environment on the luminescence of rare earths
Su, G. 113

Ab-initio calculations of electric dipole intensity parameters for lanthanide f–f transitions
Reid, M.F., B. Ng and D.J. Newman 115

The calculation of luminescence intensity parameters of rare earth ions doped in Y_2O_3 crystals
Mei, F., G. Yang and Y. Xu 117

Correlation of excitation spectroscopy of edge luminescence and persistent photoconductivity in CdS
Baum, D., H.X. Jiang and A. Honig 119

Electron beam effects on blue luminescence of zinc-doped GaN
Amano, H., I. Akasaki, T. Kozawa, K. Hiramatsu, N. Sawaki, K. Ikeda and Y. Ishii 121

Excitation spectroscopy of donor–acceptor pair luminescence in $ZnSe_xS_{1-x}$
Ohishi, M., M. Hiramatsu, K. Ohmori, H. Saito and S.R. Tiong 123

Photoluminescence spectra and radiative centers in $Al_xG_{1-x}P$
Jiang, B., X. Lin and X. Liu 125

Effects of alloying and hydrostatic pressure on the luminescence of Mn in GaAs
Samuelson, L. and S. Nilsson 127

Time-resolved fluorescence and energy transfer of Cu^+-doped fluorophosphate glass
Liu, H. and F. Gan 129

Temperature dependence of the homogeneous optical linewidth of impurities in glasses
Reineker, P. and K. Kassner 131

Fluorescence yield enhancement due to dispersed silver particles in Eu^{3+} doped glasses
De Sá, G.F., W.M. de Azevedo and O.L. Malta 133

The synthesis of rare earth borate glasses and their luminescence properties
Li, Z., P. Wu, X. Jiang, Z. Zhang and S. Xu 135

Thermally stimulated luminescence induced in alkali halides by VUV radiation at LHeT
Kristianpoller, N. and Z. Davidson 137

Brown diamonds: long lived visible luminescing centres
Pereira, E. and L. Santos 139

The recombination cross section–electron energy relation of the (e,A°) emission in CdTe:Li
Liu, J. and X. Xu 141

Photoluminescence properties in microcrystalline silicon films
Liu, H., W. Tang, X. Feng and Z. Li 143

Improved performance of certain II–VI phosphors
Buhks, E., A. Goldstein and W. Yen 145

Excitonic and edge emissions in MOCVD-grown epitaxial films and bulk crystal of ZnS
Kawakami, Y., A. Sawada, K. Kurisu, Z. Kawazu, T. Taguchi and A. Hiraki 147

Interatomic radiative transition of a valence electron to inner core: luminescence from Cs-halides and RbF at room temperature
Kubota, S., J. Ruan(Gen), S. Sakuragi, M. Itoh and S. Hashimoto 149

Luminescence in silicon in electric and magnetic fields
Zhao, Q.X., H. Weman and B. Monemar 151

Luminescence from self-trapped holes in manganese-doped calcium fluoride single crystals
Jahan, M.S., D.W. Cooke and C. Alexander, Jr. 153

Mechanism of the photostimulated luminescence of BaFCl:Ce crystal
Lin, J. and M. Su 155

Spectroscopic properties of the solid solutions $CeMgAl_{11}O_{19} - SrAl_{12}O_{19}$ and $CeMgAl_{11}O_{19} - SrMgAl_{10}O_{17}$
Huang, J., H. Wang, J. Hu and X. Yu 157

The $4f5d-f^2$ radiative transition probabilities of Pr^{3+} in PrP_5O_{14} crystals
Zhang, S. 159

On the broad band emission of Pr^{3+} in LnOX (Ln = La, Gd or Y; X = Cl, Br or I)
Li, Y. 161

Luminescence of cerium (3 +) activated rare earth silicophosphates
Huang, Z. and G. Ma 163

The luminescence of Ce^{3+} in Ln_2SO_6 (Ln = La, Gd, or Y)
Li, Y. 165

The interaction between Mn and different Sm centers in ZnS
Xu, W., X. Zhang and X. Xu 167

Photoionization of Eu^{2+} precipitates in NaCl
Aguirre de Carcer, I., F. Cusso and F. Jaque 169

Valence states and luminescence of europium in BaFBr:Eu crystals
Sun, X. and M. Su 171

Studies on the degradation of photoluminescence of some phosphors
Lu, L. and Y. Xu 173

Photoluminescence of terbium ion in the binary system of GdB_3O_6–CeB_3O_6
Guo, F. and Y. Peng 175

Physico-chemical properties and luminescence of $LaOBr_{1-x}Cl_x:Tb^{3+}$ system
Wang, Y., W. Zhao and M. Su 177

Thermoluminescence and magnetic susceptibility correlation studies of Dy^{3+} doped $CaSO_4$ phosphors
Mulla, M.R. and S.H. Pawar 179

Spectral properties and intensity parameters of $Ho^{3+}:Gd_3Ga_5O_{12}$(Ho:GGG) single crystals
Wang, Q., S. Zhang, S. Wu and X. Dong 181

Low-temperature homogeneous linewidth of the $^2E-^4A_2$ transition of Cr^{3+} in silver β-alumina
Montagna, M., G. Mariotto and F. Rossi 183

Mn^{2+} and Fe^{3+} doped oxides for short wavelength solid state lasers
Clausen, R. and K. Petermann 185

Luminescence and photoacoustic measurements of $LiAl_5O_8:Fe^{3+}$
Abritta, T. and F. de Souza Barros 187

Special luminescence properties of BaF_2 crystals
Shi, C., T. Kloiber and G. Zimmerer 189

Dispersive transport and multiple trapping in solid N_2
Zumofen, G., M. Loher and K. Dressler 191

Photoluminescence of Ti^{3+} in phosphate glasses
Bausa, L.E., F. Jaque, J. Garcia Sole, R. Cases and A. Duran 193

Light-induced changes of PL and PC in a-Si_xC_{1-x}:H films at low temperature
Wang, F. and W. Tang 195

Photoluminescence fatigue effect in GD a-Si:H:O
Dong, M., X. Wu, G. Han and Z. Ding 197

Investigations on the X-ray luminescence of LaOBr:RE^{3+}-phosphors
Starick, D., S.I. Golovkova, A.M. Gurvic and G. Herzog 199

Section 7. Luminescence and Photochemical Processes of Molecules, Polymers and Biological Systems

Optical resolution of hydrogen tunneling levels in benzoic acid crystals
Trommsdorff, H.P., R.M. Hochstrasser and M. Pierre 203

Luminescence and phase change in a discotic liquid crystal
Sasson, R., O. Braitbart and A. Weinreb 207

Time resolution of a short-wavelength chloroplast fluorescence component at low temperature
Lin, S. and R.S. Knox 209

Luminescence of neutral and protonated aminoquinoxalines
Waluk, J. 211

Photochemically induced intermolecular exchange of bromine and chlorine observed by optically detected NQR on chlorocoumarin in dibromobenzene single crystals
Schneider, T. and C. von Borczyskowski 213

Chlorotetracycline-induced fluorescence from calcific plaque with UV laser excitation
Clarke, R.H., F.M. Cerio and J.M. Isner 215

The characteristic fluorescence of the serum of cancer patients
Xu, X., J. Meng, S. Hou, H. Ma and D. Wang 219

Luminescence of the oriental hornet Vespa orientalis
Ishay, J.S., T. Benshalom-Shimony, N. Kristianpoller and D. Weiss 221

Raman scattering spectra of Panax Ginseng chloroplasts and living leaves
Tang, S., L. Liu and J. Wang 223

Bioluminescence of Vibrio orientalis in vitro: decanol initiated bioluminescence
Zhu, W., X. He, S. Huang and J. Yan 225

Applications of circularly polarized luminescence spectroscopy to biochemical systems
Çoruh, N., G.L. Hilmes and J.P. Riehl 227

Phonon assisted exciton transfer in biological molecule
Cai, Z., X. Zhang and S. Tang 229

A study of photoluminescence of light harvesting complexes in cyanobacteria
Mahajan, S., M.Sai P.S. and A. Kumar 231

Study on exciplexes formed by benzene, naphthalene, anthracene and 1,4-dicyanobenzene
Zhang, L. and S. Chen 233

Fluorescence of the complexes of Eu(III) with β-diketones and bases in methyl alcohol and resins
Li, Y., Y. He, M. Gong, Y. Yang, J. Wang, M. Li and Z. Liang 235

Excimer formation of chlorine in rare gas solids studied by luminescence spectroscopy
Gürtler, P., H. Kunz and J. Le Calvé 237

N,N'-bis-(2-naphthylmethyl) piperazine: a compound exhibiting intramolecular exciplex and excimer formation in mixed solvents
Zhou, Q. and H. Xu 239

Isomeric effect of exciplex formation
Chen, S. and Z. Chen 241

Effect of post-irradiation storage condition on thermoluminescence from ultra-high molecular weight polyethylene
Jahan, M.S., G.X. Tessema, B.W. Campbell, J.A. Davidson and G. Schwartz 242

Determination of the range of slow electrons in solid polymethylmethacrylate by means of fluorescence measurements
Sasson, R., E.T. Arakawa, O. Braitbart and A. Weinreb 244

Terbium- and europium-activated lanthanum phthalate phosphors
Sun, J., C. Chen and Z. Qin 246

New phenomena of emission dependence of intramolecular excited state complexes of DMNP in polar solvents on excitation wavelength
Ge, G., D. Li, N. Tian, G. Xiong, X. Xu, Q. Zhou and H. Xu 248

Vibrational to electronic energy transfer from CO to O_2 in rare gas matrices
Galaup, J.P., R. Charneau and H. Dubost 250

Quenching of the magnetic field effect of cyanophenanthrene –trans-anethole exciplex luminescence by trivalent lanthanides
Basu, S., D. Nath and M. Chowdhury 252

Exciplexes in supersonic jets
Anner, O. and Y. Haas 254

Study of experimental conditions and influencing factors on chemiluminescence of polymorphonuclear leukocytes
Yang, J. and L. Liu 256

The visible chemiluminescence of the reaction $F + CH_3F$
Zhou, S., Y. Qiu, J. Shi, F. Li and Y. Hu 258

Spectroscopy and photochemistry of Au aggregates in rare gas matrices
Markus, R., P. Moutard, M. Chergui and N. Schwentner 260

Sensitized chemiluminescence of coumarins as a possible component of plants ultraweak luminescence
Slawinska, D. and J. Slawinski 262

Characteristics of laser induced luminescence in polyacetylene
Jin, C. and X. Zhang 264

Enhancing effect of excimer formation of phenyl propionate by β-cyclodextrin
Zhang, L. and S. Chen 266

Luminescence of chromium(III) L-alaninato and other related complexes
Tsubomura, T., M. Morita and I. Ohkouchi 268

Total luminescence spectroscopy
Wild, U.P., M. Luond, E. Meister and G.W. Suter 270

Low temperature non-thermalised luminescence of $Ru(bpy)_3^{2+}$ doped in $Cd(bpy)_3(PF_6)_2$ single crystals
Krausz, E. and G. Moran 272

Role of solvation on dye fluorescence
Baldini, G., G. Chirico, L. della Torre and G. Varani 274

Four emission bands from a quadrate chromium(III) complex
Tuszynski, W. and E. Strauss 276

Excimer luminescence of anthracene derivatives at high pressure
Brillante, A., R.G. della Valle, K. Strössner and K. Syassen 278

Delayed fluorescence of charge-transfer crystals.Triplet–triplet annihilation vs. thermal activation of excitons
Prochorow, J. and B. Kozankiewicz 280

The fluorescence of naphthalenecarbohydroxamic acids and related amides
Lipczynska-Kochany, E. 282

Luminescence properties of some differently substituted indoles
Girlanda, R., G. Martino, A.M. Mezzasalma, G.Mondio and G. Saitta 284

Luminescence kinetics of europium(III) chelates
Zhaô, X. and H. Fei 286

Luminescence of lanthanide cryptates
Sabbatini, N. and G. Blasse 288

Luminescent properties of dibenzylsulfoxides of rare earth nitrates $Ln(NO_3)_3.3(C_6H_5CH_2)_2SO$ ($Ln = Sm^{3+}$, Eu^{3+}, Tb^{3+}, Dy^{3+})
Su, Q. and Y. Lu 290

Phase transition and luminescence in *p*-terphenyl crystals
Uchida, K. and Y. Takahashi 292

The photoluminescence of conducting polymer P3MT
Yuan, R., Z. Huang, W. Tang, Z. Li, Y. Zheng and X. Shen 294

Section 8. Luminescence Centers, Defects, Levels

Fluorescence and photoionisation processes of divalent Yb ions in SrF_2
Moine, B., C. Pedrini, D.S. McClure and H. Bill 299

Laser excited luminescence of hydrogenated $SrF_2:Er^{3+}$ crystals
Cockroft, N.J. and G.D. Jones 301

Influence of high pressure on the emission spectra and crystal field parameters for TbP_5O_{14}
Chi, Y., S. Liu, H. Zhang and L. Wang 303

Optical properties of Cr^{3+} in fluoride hosts
Payne, S.A., L.L. Chase and W.F. Krupke 305

Spectroscopy of the ^2E excited state of Cr^{3+} in alexandrite
Majetich, S., D. Boye, J.E. Rives and R.S. Meltzer 307

Electronic structures of Cr^{3+} doped $LaMgAl_{11}O_{19}$, a potential vibronic laser material
Michel–Calendini, F., H. Chermette and G. Boulon 309

Kinetics of the formation of $Ni^{3+}(3d^7)$ ions in ZnS and their detection by near-infrared emission
Goetz, G. and H.-J. Schulz 311

Laser spectroscopy as a probe of structural changes in Eu doped $La_{2-x}Sr_xCuO_4$
Tissue, B.M. and J.C. Wright 313

Enhancement of color center luminescence in neutron irradiated Al_2O_3
Pogatshnik, G.J., Y. Chen and B.D. Evans 315

Recombination luminescence in reactor and 14 MeV neutron irradiated Al_2O_3
Atobe, K., M. Nakagawa and M. Okada 317

UV-induced loss mechanisms in a Ce^{3+}:$YLiF_4$ laser
Lim, K.-S. and D.S. Hamilton 319

Zero phonon lines of the M-center in ZnS crystals
Hoffmann, A., I. Broser and P. Thomsen-Schmidt 321

Two types of F-centers in BaFBr
Ye, B., J.-H. Lin and M.-Z. Su 323

F and F^+ luminescence in thermochemically reduced MgO crystals
Chen, Y. and V.M. Orera 325

The deep levels in superlattices
Huang, M.-Z., Y. Gu, X. Shi and S. Ren 327

Internal photoluminescence of iron in GaAs and InP
Leyral, P., C. Charreaux and G. Guillot 329

Detection of zero phonon lines in the broad band blue emission of ZnS–Cu
Broser, I., R. Broser and E. Birkicht 331

A study of two deep electron traps in ZnSe crystals
Wang, S. and X. Fan 333

Investigation of deep defects in $GaAs_{1-x}P_x$ by double light source PHCAP
Zhou, B., J. Huang and S. Chen 335

Complex defects in GaP studied by optically detected magnetic resonance (ODMR)
Chen, W.M. and B. Monemar 337

Time resolved luminescence and absorption spectroscopy of defects in MgO and Al_2O_3
Williams, Jr., G.P., G.H. Rosenblatt, M.J. Ferry, R.T. Williams and Y. Chen 339

The thermoluminescence and phosphorescence related to the $[SiO_4/Na]^*$ center
Halperin, A. and S. Katz 341

Defect luminescence in tungstates
Grasser, R., W. Pompe and A. Scharmann 343

Lattice defects in thermoluminescent calcite
Nakagawa, M., K. Fukunaga, M. Okada and K. Atobe 345

Thermally stimulated luminescence in SiO_2: The 100 °C peak and related defect dynamics
Martini, M., G. Spinolo and A. Vedda 347

Luminescence and photoconductivity of pure β-$ThBr_4$ single crystal
Hubert, S. and E. Simoni 349

Configuration of F_A(II) centers in RbCl:Li^+ derived from luminescence experiments
Baldacchini, G., F. de Matteis, U.M. Grassano, A. Scacco and F. Somma 351

Fine structure in luminescence spectra of KCl–KF crystals doped with Eu^{++} ions
Bryukvin, V., I. Parfianovich, V. Niznikov and E. Penzina 353

Luminescence of Z_4 centers
Sobolev, L., E. Penzina and K. Makushev 355

Investigations of the origin of the deep center related luminescence bands due to neutron-transmutation doping (NTD) in GaAs after annealing and its influence on compensation
Rentzsch, R. and K. J. Friedland 357

Photoluminescence decay mechanism of the ~1.49 eV emission in LEC-grown semi-insulating GaAs
Teh, C.K. and F.L. Weichman 359

Characterization of deep-levels around the dislocation in GaAs materials by cathodoluminescence
Ikeda, K. and Y. Ishii 361

Study of local vibrational mode absorptions of a defect related to EL2 in Si-GaAs
Song, C., W. Ge, D. Jiang and C. Xu 363

A multistate model for DX centers in $Al_xGa_{1-x}As$ alloy
Kang, J. and Q. Huang 365

Optical properties of EL2 family in GaAs
Zhou, B.L. and B.H. Hu 367

New phenomena observed on an electron trap related to oxygen in $Al_xGa_{1-x}As$/GaAs DH LED
Wu, Z., B.L. Zhou and G.C. Zhang 369

Deep levels in n-InP
Hu, B.H., B.L. Zhou and Z.X. Chen 371

A study of a deep centre with an excited state: Photo-thermal excitation behaviour by junction capacitance techniques
Yang, X. and J.W. Allen 373

Low temperature transient of deep centre Zn in GaN
Gao, Y., P. Bergman. Bo. Monemar and P. Holz 375

Growth and photoluminescence of CdTe single crystals
Huang, X., G. Lin and Y. Jing 377

Optical properties of YAG and YAP single crystals in VUV
Tomiki, T., F. Fukudome, M. Kaminao, M. Fujisawa, Y. Tanahara and T. Futemma 379

Action of excessive fluorine in Ce–Mn activated calcium fluorophosphate on luminescence and synthesis mechanism
Zhou, J., M. Tang and X. Luo 381

Laser selective excitation of CaS:Pr
Huang, S., W. Li and X. Luo 383

The effect of infrared light on Nd^{3+} luminescence in ZnS
Qin, W., W. Sun and S. Huang 385

Site selective laser spectroscopy of the dynamics of defect aggregation in alkali halides
Ramponi, A.J. and J.C. Wright 387

Luminescence damage and thermoluminescence phenomena in tungstates doped with trivalent rare earth and transition metal ions
Grasser, R., I. Jeuck, A. Scharmann and J. Ströde 389

Discrimination of Sm centers in ZnS by site selective laser spectroscopy
Hommel, D., W. Busse, H.-E. Gumlich and D. Suisky 391

The luminescence of Eu^{2+} in CaF_2 crystal
Hao, Z., J. Cai and Y. Li 393

High pressure effect on luminescence and crystal field in Y_2O_2S:Eu
Liu, S., Y. Chi and L. Wang 395

Electronic Zeeman, hyperfine and superhyperfine interaction in CaF_2:Ho^{3+}
Hasan, Z., R. Danby and N.B. Manson 397

Site selective excitation (SSE) of ZnS:Ho, Li
Shen, Y. 399

Luminescence of ZnS:Ho under excitation around the band edge (EBE)
Zhang, H. and Y. Shen 401

The Fermi level effect on the luminescence from GaAs:Cr materials
Ge, W. 403

Photoluminescence of Mn-, Cr-doped and undoped ε-GaSe
Chung, C.H., S.R. Hahn, H.L. Park, W.T. Kim and S.I. Lee 405

Investigation of manganese centres in ZnS and ZnSe thin-film layers by EPR
Kreissl, J. and W. Gehlhoff 407

Effect of local atomic arrangement on Co-related luminescence in III–V alloy semiconductors
Nishino, T., S. Shirakata and Y. Hamakawa 409

Isotope shift of emission and absorption lines at CdS:Ni^{2+}: Interpretation by a dynamic Jahn–Teller effect
Scherz, U., A. Hoffmann, B. Nestler and L.B. Xu 411

Embedded-cluster-energy calculation of electronic structure of alumina, ruby and vacancies in alumina
Xia, S. and D.E. Ellis 413

Decay of internal luminescence transitions of 3d impurities in II–VI compounds – recent experiments and refined interpretations
Goetz, G. and H.-J. Schulz 415

Deep states related to 3d-transition metal impurities in $GaAs_{1-x}P_x$ alloy system
Gu, Y., M. Huang and K. Wang 417

The fluorescence spectrum of chrysoberyl $BeAl_2O_4:Cr^{3+}$ at high pressure and low temperature
Liu, J., R. Tang, Y. Wang, W. Jia, Y. Shang and S. He 419

The nature of Cr(III) luminescence in $MgAl_2O_4$ spinel
Stręk, W., P. Dereń and B. Jeżowska-Trzebiatowska 421

Section 9. Excitons, Polaritons and Collective Phenomena

Indirect excitons in short period superlattices
Sturge, M.D., E. Finkman and M.C. Tamargo 425

Photoluminescence of solid neon and desorption of neutral atoms
Kloiber, T., W. Laasch, G. Zimmerer, F. Coletti and J.-M. Debever 427

Hopping motion of self-trapped excitons in NaI
Nishimura, H. and S. Nagata 429

Observation of highly mobile excitons along the stracking fault plane in BiI_3 by space-resolved spectroscopy
Karasawa, T., T. Kawai, I. Akai and Y. Kaifu 431

Excitation and transmission spectroscopy of bound exciton complexes in wide-gap II–VI semiconductors under high excitation densities
Gutowski, J., T. Hönig, N. Presser and I. Broser 433

Three-photon spectroscopy of excitons and polaritons in alkali halides
Beerwerth, F. and D. Fröhlich 435

One-and two-photon fluorescence excitation spectra of multi-chromophoric molecules
Samanta, A., T. Kundu and M. Chowdhury 437

New perspectives on energy transport in molecular aggregates
Brown, D.W., K. Lindenberg and B.J. West 439

Triplet–singlet conversion of self-trapped exciton states in NH_4Br
Itoh, M. and H. Kaneko 441

The nature of the intrinsic luminescence bands in alkali halide crystals
Song, K.S. and C.H. Leung 443

Self-trapped exciton in LiI
Nagata, S., T. Komatsu, S. Hashimoto, H. Nishimura and T. Okada 445

Decay processes in relaxed triplet states of self-trapped excitons in potassium halides
Mukai, T., O. Arimoto, K. Kan'no and Y. Nakai 447

Nonadiabatic inconsistencies in barrier models of excitonic self-trapping
Wagner, M. and A. Köngeter 449

Stabilities of the self-trapped holes and excitons in alkali halides
Nakaoka, Y. and T. Higashimura 451

Dynamics of the self-trapping process in cesium iodide
Schreiber, M., H.-J. Kmiecik and W. Schmidt 453

Exciton–lattice relaxation in aromatic molecular crystals via potential barriers
Matsui, A., K. Mizuno, N. Tamai and I. Yamazaki 455

Trapping of excitons with multiphonon emission at impurities in molecular crystals
Singh, J. and A. Thilagam 457

Davydov solitons in Raman spectra of chloroplasts
Jin, C. 459

Polaron theory of concentration quenching of F center luminescence in KCl
Georgiev, M. and M. Staikova 461

Temperature dependence of the bound polaron in a polar crystal slab
Sun, J. and S. Gu 463

Surface and guided-wave exciton-polaritons in molecular crystals and insulators (non-magnetic and magnetic)
Zeng, H. and J. Fang 465

Non-Markovian effects in the transport and localization of electrons and excitons
Reineker, P. and K. Kassner 467

Binding energy of exciton in a polar crystal slab
Gu, S. and M. Shen 469

Importance of a quantum effect of phonons in the Urbach region of optical spectra even at high temperatures
Sumi, A. and H. Sumi 471

Resonant light scattering of exciton strongly interacting with LA-phonon
Iida, T., T. Karasawa and M. Sakai 473

Thermalization of excitons in Cu_2O
Reimann, K. 475

Temperature dependence of exciton linewidth in CsI
Beerwerth, F., D. Fröhlich and V. Leinweber 477

Dynamics of exciton interactions in CuCl under high excitation conditions
Grun, J.B., R. Leonelli, A. Manar and R. Levy 479

Urbach rule in the luminescence spectrum of HgI_2 and a metastable localized exciton
Goto, T., J. Takeda and M. Matsuoka 481

Resonance fluorescence of localized excitons in $ZnSe_{1-x}Te_x$
Permogorov, S., A. Reznitsky, A. Naumov, H. Stolz and W. von der Osten 483

Life-time studies on exciton relaxation in CdI_2 crystals
Nakagawa, H., Y. Muneda and H. Matsumoto 485

Photoluminescence and thermal quenching of free excitons under normal pressure in GaP:N
Dou, K., X. Zhang and Q. Hong 487

Exciton tunneling in $GaAs_xP_{1-x}N$, a weakly disordered semiconductor
Gershoni, D., A. Fried, A. Ron and E. Cohen 489

Transient state study of the polarization properties of sideband recombination emissions in GaN crystals
Bao, Q., F. Zhang, S. Pang, D. Li, N. Tian and X. Xu 491

Enhanced recombination through deep impurities within electron–hole liquid in germanium
Ogawa, K., T. Ohyama and E. Otsuka 493

Optical properties of excitons confined two-dimensionally in a stacking fault plane in BiI_3
Komatsu, T. 495

Volume and quasi-surface excitonic states in layered semiconductor
Lisitsa, M.P. and F.V. Motsny 497

Temperature dependent damping dispersion of excitonic polaritons in CdS
Pantke, K.-H. and I. Broser 499

Pairing of off-center small polarons due to dipole–dipole interaction
Georgiev, M. and M. Borissov 501

Section 10. High Density Excitation, Nonlinear Effect in Optical Processes

Spectral holeburning by population storage in metastable Zeeman and optical sublevels of the Nd^{3+} ion
Macfarlane, R.M. and J.-C. Vial 505

Cooperative excitations in neodymium chloride
Pelletier-Allard, N. and R. Pelletier 507

Energy transfer and inversion saturation in Tm,Ho:YAG
Huber, G., P. Mitzscherlich, T.Y. Fan and R.L. Byer 509

Changes of the site distribution induced by hole burning
Fünfschilling, J., D. Glatz and I. Zschokke-Gränacher 511

Hole burning with excitation into the triplet state
Lin, S., J. Fünfschilling and I. Zschokke-Gränacher 513

Luminescence of liquids and solids by two-photon excitation
Chen, C.H. and M.P. McCann 515

Direct two-photon excitation in some terbium materials
Jacquier, B., J.-C. Gacon, J.-F. Marcerou, M.F. Joubert and R.L. Cone 517

Two-photon excitation spectroscopy of Mn^{2+}
Thorne, J.R.G., R.G. Denning and I.D. Morrison 519

The luminescence of highly excited CdS
Liu, X., Q. Bao, R. Dai and X. Xu 521

The interaction between excitons in ZnSe epilayers under different excitation intensity
Ma, L., Z. Tang and X. Fan 523

Study on the luminescence of GaP:N under selective excitation of excitons bound to NN_1 centers
Hong, Q., K. Dou and X. Zhang 525

Optical nonlinearity due to increased absorption in CdS at room temperature
Yang, F., D. Li, N. Tian, G. Xiong and X. Xu 527

Picosecond coherent light scattering in the exciton–biexciton resonance of CdSe
Hvam, J.M., I. Balslev and C. Dörnfeld 529

Optical gain in the D–A luminescence of $CdIn_2S_4$
Fortin, E. and J. Beauvais 531

Nonlinear refraction of gaussian laser beams in CdS at $\lambda = 532$ nm
Petersen, P.M. 533

The dynamics of non-linear effects in optical processes
Amujuri, M.S. 535

Delayed radioluminescence yield study based on a kinetic model of triplet quenching
Botelho do Rego, A.M. and J. Lopes da Silva 537

High yield singlet–triplet transfer for efficient saturable absorbers
Eyal, M. and R. Reisfeld 539

Spatial coherence in large-sample superfluorescence of O_2^- centers in KCl
Schiller, A., L.O. Schwan and H.D. Schmid 541

Vibronic spectra of metal complexes induced by two-photon excitation
Stręk, W. and J. Sztucki 543

Section 11. Coherent Processes, Pico- and Femtosecond Spectroscopy, Transient Phenomena

A new simple analytical approach to degenerate four-wave mixing
Petersen, P.M. 547

Demonstration of four wave mixing line narrowing spectroscopy – the nonlinear analogue of fluorescence line narrowing
Riebe, M.T. and J.C. Wright 549

Photon echo relaxation and hole burning in Tb^{3+}:$LiYF_4$ and $LiTbF_4$
Liu, G.K., M.F. Joubert, R.L. Cone and B. Jacquier 551

Intensity correlation measurement of time-resolved photoluminescence from GaAs MQWs
Eakin, H.J.W. and J.F. Ryan 553

Picosecond dynamics of electron transfer at semiconductor liquid junctions
Kasinski, J.J., L. Gomez-Jahn, L. Min, Q. Bao and R.J.D. Miller 555

Dynamics and spatial distribution of edge luminescence generators in CdS from time-resolved excitation spectroscopy
Jiang, H. X., D. Baum and A. Honig 557

Thermalization of photoexcited carriers in a-Si:H
Czaja, W., K. Maschke and E. Merk 559

Dynamic Stokes shift in rhodamine 6G–ethanol solution
Kinoshita, S., N. Nishi and T. Kushida 561

Fluorescence and photochemistry of dye sensitizers in Nafion membrane
Niu, E., K.P. Ghiggino, A.W.-H. Mau and W.H.F. Sasse 563

Observation of a possible IR superfluorescence from F-center/CN^- defect pairs in CsCl
Yang, Y. and F. Luty 565

Homogeneous linewidths and photon echo decay rates of rare earth and transition metal impurities in glasses
Huber, D.L. and W.O. Putikka 567

Theory of resonantly excited high-density exciton systems
Schäfer, W., K.-H. Schuldt, R. Binder and J. Treusch 569

Vibrational energy relaxation processes in heme proteins
Genberg, L., F. Heisel, G. McLendon and R.J.D. Miller 571

Transient resonant light scattering by excitons in a disordered system
Aihara, M. 573

The picosecond study on the valence hole inter-band transition in CdS single crystal
Qi, J., K. Shi, G. Xiong and X. Xu 575

Picosecond dynamics of secondary emissions of excitonic polariton in high purity ZnTe
Oka, Y., K. Nakamura and H. Fujisaki 577

Study on photosensitized triplet–triplet absorption of naphthylalkanes
Yu, Q., J. Ye, S. Guo and H. Shou 579

Fluorescent properties of hematoporphyrin derivative in solutions and biological cells
Kinoshita, S., T.F. Liu, T. Seki and T. Kushida 581

Section 12. Nonradiative Processes, Nonequilibrium Phonon Effects, Hot Luminescence

Hot carrier relaxation processes in GaAs–GaAlAs multiple quantum well structures
Xu, Z., Y. Li, J. Xu, B. Zheng, J. Xu, W. Zhuang and W. Ge 585

Trap–Auger effect in relatively pure silicon
Landsberg, P.T. 587

Localized center luminescence quenching by the Auger effect
Langer, J.M. 589

Vibrationally hot emission and electronic relaxation of CO in Ne matrix
Bahrdt, J., M. Chergui and N. Schwentner 591

Radiative and non-radiative decay of excitons in solid xenon
Kloiber, T., H.-J. Kmiecik, M. Kruse, M. Schreiber and G. Zimmerer 593

Electron–phonon coupling and self-quenching in transition metal vibronic laser materials
Auzel, F., J.M. Breteau and D. Meichenin 595

Determination of deep centre parameters from electroabsorption spectra
Schenk, A., R. Enderlein and D. Suisky 597

Fine vibronic and electron–phonon interactions in molecular impurities in crystals via resonance Raman and excitation profiles
Rebane, L.A. and G.E. Blumberg 599

Effect of trace Bi^{3+} on luminescence of Ce^{3+} in CaS:Ce,Bi
Zhou, Y., Z. Wang and S. Liu 601

Hot luminescence in F center under one- and two-photon excitations
Muramatsu, S., K. Nasu and M. Aihara 603

Influence of phonons and plasmons on semiconductor band edge spectra
Haug, H., J.F. Müller and J. Liebler 605

Resonant secondary emission spectra of optically aligned hot excitons in ZnTe: effect of the excitation intensity
Lisitsa, M.P., M.Y. Valakh and A.P. Litvinchuk 607

Non-radiative transition rates: accepting and promoting phonon modes in an N-mode model
Schenk, A., D. Suisky and R. Enderlein 609

The vibrational relaxation processes in $BeAl_2O_4:Cr^{3+}$
Xu, J., K. Shi, G. Xiong and X. Xu 611

Resonant Raman scattering in red-HgI_2 by polarization modulation spectroscopy with piezo-birefringent modulator
Kuwata, M., Y. Ueno and N. Nagasawa 613

Vibrationally hot Rydberg luminescence of NO in Ne matrices
Chergui, M., N. Schwentner and V. Chandrasekharan 615

The intermediate coupling polaron in a polar crystal slab
Gu, S., Y. Li and L. Zheng 617

Non-adiabatic electron phonon interaction: reduction of high dimensional problems and matrix continued fraction treatment
Scheuing, A., P. Reineker, C. Durst and E. Sigmund 619

Section 13. Dynamics of Excited States, Energy Transfer, Fractals in Luminescence

Excited state dynamics in restricted geometries
Drake, J.M., J. Klafter and P. Levitz 623

Novel excitation mechanism of rare earth intra-shell emission
Stapor, A., M. Godlewski, H. Przybylinska and D. Hommel 625

Evidence of different Mn luminescence centers in $Zn_{1-x}Mn_xS$ by time resolved laser spectroscopy
Benecke, C., W. Busse, H.-E. Gumlich and H.-J. Moros 627

Luminescence spectrum of the vibronic laser $KZn_{1-x}Co_xF_3$:Ni
Rowell, N.L. and D. J. Lockwood 629

New luminescent centre in YGG:Cr crystal
Yin, M., L. Lou and S. Xu 631

Energy transfer between free excitons and the 3d-electrons of Mn^{2+} in CdS:Mn
Wedemeyer, J., U. Stutenbäumer and H.-E. Gumlich 633

Coherent exciton transport in substitutionally disordered crystals
Skinner, J.L., L.J. Root and J. Bauer 635

Energy transfer in rare earth codoped $LiYF_4$
Barthem, R. B. and T. Buisson 637

Concentration quenching of Gd^{3+} luminescence in solids
Blasse, G., H.S. Kiliaan and A.J. de Vries 639

Tracking anomalous diffusion by luminescent probes
Blumen, A., G. Zumofen and J. Klafter 641

One-dimensional luminescence kinetics; a submicron probe
Prasad, J. and R. Kopelman 643

Characterization of aggregates and their importance for energy transport in chemically mixed crystals
Grimm, J. and C. von Borczyskowski 645

$Ce^{3+} \rightarrow Eu^{3+}$ energy tranfer in CaS phosphor
Park, H.L., C.H.Chung, K.S. Hong, S.I. Yun and B.G. Moon 647

Energy transfer processes between erbium and holmium in $LiYF_4$
Rubin, J., A. Brenier,R. Moncorgé and C. Pédrini 649

Energy transfer processes in yttrium oxide activated with europium
Klaassen, D.B.M., R.A.M. van Ham and T.G.M. van Rijn 651

$Tb^{3+} \rightarrow Ce^{3+}$ energy transfer in $Y_3Ga_5O_{12}:Ce^{3+},Tb^{3+}$ garnet
Liu, X., X. Wang, L. Ma, W. Shen and Z. Wang 653

Energy transfer between Tb^{3+} and Tm^{3+} ions in $Tb_xTm_yY_{1-x-y}P_5O_{14}$ crystals
Zhang, S. and Y. Bai 655

Interaction of Sm^{3+} ions in borate glass
Zhang, Z., X. Jiang, Z. Li, P. Wu and S. Xu 657

Luminescence and energy transfer in $BaGdF_5$
Banks, E., M.T. Sobieraj, S. K. Ruan and A.M. Srivastava 659

A Ce^{3+} sensitized, Tb^{3+},Mn^{2+} codoped polyaluminate phosphor
Hong, G., Q. Jia and Y. Li 661

Energy transfer phenomena in $GdMgB_5O_{10}:Pb^{2+},Mn^{2+}/Tb^{3+}$
Shen, C., Z. Hao and Z. Gong 663

Fluorescent decay and energy transfer in GaP:(Bi,N) crystals
Liu, X., B. Jiang and X. Lin 665

Response function in fluorescence decay dynamics
Lou, L. and S. Huang 667

A discrete model for energy transfer and its application to aluminate and octaborate
Huang, J. 669

Energy transfer by two kinds of excimers in pyrene crystals
Takahashi, Y., T. Kitamura and K. Uchida 671

Short range effects on pyrene-excimer energy transfer to 9,10-diphenylanthracene
Martinho, J.M.G. and V.R. Pereira 673

Energy transfer and highly resolved emission of $[Ru_{1-x}Os_x(bpy)_3](PF_6)_2$
Yersin, H., G. Hensler and E. Gallhuber 676

Time-resolved luminescence and energy-transfer processes in the uranyl compound $[(CH_3)_4N]_2UO_2Cl_4$
Morita, M. and T. Shoki 678

Electron transfer of some covalently linked tetraphenylporphyrin–nitrobenzene model compounds
Zhu, H., C. Guo, L. Yu, J. Zhang and Y. Feng 680

Studies on energy transfer and luminescence of europium chelates
Shou, H., Q. Yu and J. Ye 682

Fluorescence study on the intermolecular energy transfer of dye mixture C440/C540/safranin-T
Wang, W., J. Xu, L. Li, B. Yu and Z. Guan 684

The sensitized fluorescence of chlorophyll a by carotenoid
Meng, J. and S. Hou 686

Simulations of one-dimensional and fractal luminescence kinetics
Li, L. and R. Kopelman 688

Recombination kinetics in low dimensions
Argyrakis, P. and R. Kopelman 690

Fluorescence dynamics in Er^{3+} and Ho^{3+} doped new fluoride glasses
Moine, B., C. Pedrini, G. Boulon, A. Brenier, J.L. Adam and J. Lucas 692

Effect of magnetic order on the fluorescence dynamics of $LnAlO_3$ ($Ln^{3+} = Gd^{3+}$ and Tb^{3+})
Salem, Y., M.F. Joubert, C. Linares and B. Jacquier 694

Excitation spectroscopy on lanthanide oxysulfides in the soft X-ray region
Klaassen, D.B.M., C.M.G. van Leuken and K.M.H. Maessen 696

Optical phonons and fluorescence quenching in new laser crystal NAB
Ha, K. and S. Shi 698

The luminescence of mercury-like ions in alkaline earth sulfides
Hao, Z., Y. Yang, X. Yin, B. Yu and Z. Guan 700

Stark energy levels of ground states of Pr^{3+} ion in PrP_5O_{14}
Bai, Y., Q. Kan, Y. Zhao and T. Li 702

Diffuse reflectance laser photolysis studies of energy transfer at interfaces
Wilkinson, F. and L.F.V. Ferreira 704

Section 14. Optical Properties of Surface, Interface, Quantum Wells and Superlattices

Tunneling spectroscopy in a photo-excited semiconductor superlattice
Masumoto, Y. and F. Sasaki 709

Effect of nonequilibrium acoustic phonons on the luminescence of multiquantum well structures
Akimov, A.V., A.A. Kaplyanskii, V.I. Kozub, P.S. Kop'ev and B. Ya. Meltzer 711

Design rules of quantum well lasers
Nagle, J. and C. Weisbuch 713

Photogeneration of narrow quantum wells on ZnO surfaces
Many, A., Y. Goldstein, G. Yaron and S.Z. Weisz 715

Photoluminescence properties of ZnTe–ZnSe superlattices grown by hot-wall epitaxy
Yang, H., H. Fujiyasu, A. Ishida and H. Kuwabara 717

Dynamics of excitons sinking into an enlarged well in GaAs/AlAs short-period superlattice
Nakamura, A., K. Fujiwara, Y. Tokuda, T. Nakayama and M. Hirai 719

Periodicity-dependent photoluminescence of $(GaAS)_m(AlAs)_n$ superlattices
Jiang, D., K. Kelting, T. Isu, K. Ploog and H.J. Queisser 721

Magneto-optical study of the heavy-hole exciton in GaAs–(GaAl)As quantum wells
Ossau, W., B. Jäkel and G. Weimann 723

The effects of SO and LO phonon on the binding energy of the exciton in GaAs–$Ga_{1-x}Al_xAs$ quantum well
Pan, J. and H. Ruan 725

Optical properties of GD a-Si:H/a-$Si_{1-x}C_x$:H superlattices
Zhang, F., X. Xu, G. Sun, Y. Zhang and G. Chen 727

Dynamic behavior of two-dimensional exciton in GaAs single quantum well under a magnetic field
Segawa, Y., J. Kusano, Y. Aoyagi and S. Namba 729

Exciton transport phenomenon in superlattice confined quantum well
Sun, Y. 731

High resolution luminescence depth profiling of ion etched multiquantum well structures
Germann, R., A. Forchel and F. Scholz 733

Effect of electron–phonon interaction on the hydrogenic impurity binding energy in a quantum well
Shen, M. and S. Gu 735

Quantum size effect on excitons in microcrystals of cuprous halides embedded in alkali halide matrices
Itoh, T. and Y. Iwabuchi 737

Raman scattering of CdS and CdS_xSe_{1-x} microcrystals in the glass medium
Zhou, F., Y. Sun and J. Pan 739

Spectral properties of CdS(Se) microcrystallites in amorphous media
Zhang, J., F. Gan and C. Qi 741

Emission studies of surface acidity in porous Vycor glass
Lin, C.T. and W.L. Hsu 743

A study of fluorescent intensity emitted by Eu^{3+} ions near dielectric interfaces
Shu, Q.Q., P.K. Hansma, P. Das and H. Metiu 745

Donor–interface acceptor pair emission in the abrupt heterointerface
Kop'ev, P.S., V.P. Kochereshko, I.N. Uraltsev, A.L. Efros and D.R. Yakovlev 747

States of an interface polaron in polar crystals
Gu, S., Y. Li and L. Zheng 749

Properties of a magnetopolaron at the interface of polar–polar crystals
Gu, S., X. Kong and C. Wei 751

Studies of InP surface and InP–insulator interface by spectral photoluminescence
Leyral, P., H. Bouredoucen, B. Commere and S. Krawczyk 753

The characteristics of photoluminescence at GaAs/AlGaAs interface
Yuan, Y., J.L. Merz and G.A. Vawter 755

X-ray topography and photoluminescence (PL) at GaAs/AlGaAs MBE and LPE heterojunction materials
Feng, Y., D. Gao, Y. Yuan and K. Eda 757

Photoluminescence study of AlGaAs/GaAs heterojunction bipolar transistors fabricated by molecular beam epitaxy
Eda, K. and M. Inada 759

Photoluminescence from defects and impurities in GaAs/*n*-GaAlAs 2DEG structure
Jia, W., Y. Huang, J. Zhou and Y. Wang 761

Photoluminescence related to the interface of GaAs/(GaAl)As heterojunctions
Ossau, W., E. Bangert, G. Landwehr and G. Weimann 763

Section 15. Electroluminescence

Hot electron mechanisms determined from comparative studies of electroluminescence
Bryant, F.J., W.E. Hagston and M.J.R. Swift 767

Calculation of the impact cross section of rare earth centers in solids
Yu, J. and Y. Shen 769

Mechanisms of AC electroluminescence in SrS:Ce thin films grown by RF-sputtering and E-beam evaporation
Gonzalez, C. 771

Injection electroluminescence in ITO/a-Si:H structure
Zhang, F., Y. Zhang, Y. Li and G. Chen 773

Studies of a high frequency hysteresis phenomenon in ZnS:Mn ACTFEL devices
Zhu, C., R.C. McArthur, S.J.T. Owen 775

Long lifetime ZnS:Mn DCEL phosphors prepared by new technology
Xuan, L. and X. Luo 777

The counterplay between brightness and contrast in electroluminescence devices
Mach, R., L. Schrottke, G.O. Mueller, R. Reetz, E. Krause and H. Hildisch 779

Microscopic structure and distribution of Cu in the electroluminescence phosphor ZnS:Cu
Guo, C., S. Zhang, B. Li and L. Xu 782

Excitation processes of the Tb emission center in a ZnS:Tb,F thin film electroluminescent device
Mikami, A., T. Ogura, K. Taniguchi, M. Yoshida and S. Nakajima 784

The impact cross section of ErF_3 centers in ZnS thin film
Luo, B., J. Yu and G. Zhong 786

The characteristic of ACEL in ZnS:Er^{3+} thin films grown by atomic layer epitaxy method(ALE)
Meng, L. and G. Zhong 788

Electroluminescence of Er^{3+}-implanted ZnSe MIS diodes
Tian, H., X. Fan and S. Xu 790

Effect of microstructural matrix rearrangements on electroluminescence of Sio_x:TbF_3 films
Vlasenko, N.A., G.Ph. Romanova, B.V. Fenochka and V.S. Khomchenko 792

Electro- and photoluminescence from sintered ceramic-plate of ZnO:Zn phosphor
Takata, S., T. Minami and H. Nanto 794

White light emitting thin film electroluminescence cell with stacked SrS:Ce/CaS:Eu active layers
Ono, Y.A., M. Fuyama, K. Onisawa, K. Taguchi and H. Kawakami 796

The effect of annealing ZnSe crystal in molten zinc on its electricity and luminescence
Zhang, J. and X. Fan 798

Investigation on excitation processes of electroluminescence spots in forward-biased ZnSe MIS diodes
Wang, S. and X. Fan 800

Investigation of deep levels in heat-treated ZnSe crystals by ODLTS technique
Wang, S. and X. Fan 802

Photo- and electroluminescence of ZnSe grown by OMVPE
Yang, B., J. Zhang and B.W. Wessels 804

Au–Zn/Au–Sb/GaP ohmic contact of GaP LED
Lu, Z., W. Hua and Z. Ding 806

Research on photovoltaic spectra of P/N/N^+ GaP
Chen, C. and S. Liu 808

Deep electron traps and their changes during degradation in $GaAs_{0.6}P_{0.4}$ LEDs
Huang, B. and Q. Yuan 810

The dynamic temperature distributions in stripe geometry lasers
Zhang, X. and R.F. Ormondroyd 812

AlGaAs/GaAs TJS laser diodes fabricated on Si substrates by MOCVD
Hu, X., S. Sakai, T. Soga and M. Umeno 814

Section 16. Applications

Photostimulated luminescence in BaFBr:Eu^{2+} evaporated thin films
Kobayashi, H., S. Tanaka, N. Iwase and H. Yoshiyama 819

High density excitation of rare gas crystals for stimulated emission
Nahme, H., T. Kessler, R. Markus, M. Chergui and N. Schwentner 821

Spectral hole burning: high resolution optical spectroscopy and image storage
Renn, A., R. Locher, A. Meixner and U.P. Wild 823

On the integrated biophysical states of the human body based on ultra weak bioluminescence of fingertips
Zheng, R. 825

Far ultraviolet resonance Raman spectroscopy: new capability and applications in the vacuum ultraviolet region
Hudson, B. 827

Application of dynamic photoluminescence spectroscopy to catalysis – differences between anchored and impregnated Mo/SiO_2 catalysts
Anpo, M., M. Kondo, M. Che and C. Louis 829

Improvement of the positron annihilation lifetime spectrometer by using the fast decay component in BaF_2 luminescence
Zhang, T., D. Yin, S. Wang, C. Cao and J. Liang 831

Luminescence autoradiographic investigations on silica glass activated by ionizing radiation
Boden, G. 833

Application of ESR to the study of luminescence characteristics of ZnS:Mn,Cu
Li, J., W. Lu and Q. Shi 836

Effect of heat treatment on photoluminescence and interface properties in MOCVD-grown ZnSe onto GaAs and Ge
Sekoguchi, M., S. Hayamizu, T. Murase, T. Taguchi and A. Hiraki 838

The chemiluminescence from the reaction of hemoproteins with inorganic peroxides
Liu, Y. and X. Zhao 840

A study on chemiluminescence mechanism of Cu(II)–luminol–hydrogen peroxide system
Yu, Y., F. Yan and X. Wang 842

A new chemiluminescence analysis apparatus by means of a solid-state peroxyoxalate and immobilized fluorophores
Ding, X., P. Wang and G. Liu 844

Effects of luciferin concentration on the quantitative assay of ATP using crude luciferase
Wang, W. and J. Gu 846

Thermoluminescence of MgS:Eu phosphors
Rao, R.P. 848

The preparation and the characteristic of temperature-sensitive phosphors
Zhang, W., X. Lu, H. Wang, C. Shi and J. Zhang 850

Study of thermal glow curves of KCl:Ba exposed to different radiations
Akolekar, M.S., T.R. Joshi, R.V. Joshi, L.H.H. Prasad and K.P. Dhake 852

Tribothermoluminescence in NaCl:Ca (T) dosimetry material
Nehate, A.K., K.P. Dhake and T. R. Joshi 854

Studies on spectral properties of $Na_5Eu(WO_4)_4$ luminescent crystal
Pan, J., L. Yau, L. Chen, G. Zhao, G. Zhou and C. Guo 856

Blue electroluminescence from ZnSe/Langmuir–Blodgett film MIS diodes
Hua, Y., M.C. Petty, G.G. Roberts, M.M. Ahmad, H.M. Yates, N. Maung and J.O. Williams 861

Solid transparent thorium–nitrate–phosphate jelly: a new material for luminescence studies
Brandel, V. and M. Genet 863

Cathodoluminescence studies of carbon-13 diamond
Collins, A.T. and G. Davies 865

Investigation of defects in GaP using positron annihilation lifetime spectra
Zhou, B., J. Fang and J. Huang 867

New technique for spectroscopic analysis of insulating single crystal fibers
Buoncristiani, A.M. and C.E. Byvik 869

Crystal growth and optical properties of $LaMgAl_{11}O_{19}:Ti^{3+}$
Wyon, C., J.J. Aubert, D. Vivien, A.M. Lejus and R. Moncorgé 871

Spectroscopic characteristics of $BeO \cdot 3Al_2O_3:Cr^{3+}$ crystal
Hu, Z., G. Wu, X. Ma and P. Pan 875

Fluorescent properties and application of foreign ions activated polyaluminate phosphors
Liu, W., Z. Yang, F. Zhang and M. Zheng 877

Color high luminance low voltage cathodoluminescence
Ge, S. and X. Huang 879

The thermoluminescence (TL) characteristics of LiF(Mg,Cu,P) phosphor and its application in radiation dosimetry
Sun, F., G. Dai, S. Yuan and S. Song 881

The action of SiO_2 on luminescence properties of $Na_5Eu(WO_4)_4$
Wang, L. and W. Zhang 883

Luminescence and charge transfer bands of Sm(3 +) and Eu(3 +) in $Mg_3BO_3F_3$
Liu, X., Y. Zhang, Z. Wang and S. Lu 885

Synthesis, composition, structure and luminescence properties of $M_2YSbO_6:R^{3+}$ (M = Ba, Ca; R = Sm, Dy, Ho, Er, Tm)
Zhang, H. and Q. Su 887

Magnetic circularly polarized luminescence of the optical active complex Eu(III)–TFMC
Morita, M., K. Sawabe, E. Nishimura and K. Eguchi 889

A new nonradioactive night-luminous phosphor
Mao, X., Z. Wu and Y. Feng 891

Structure and luminescence properties of alkaline earth chlorosilicates
Wang, H., J. Huang, X. Yu, J. Hu and X. He 893

Spectra of Eu^{3+} in GdP_5O_{14} single crystal
Yu, Y., M. Li and S. Zhang 895

Crystal structures and spectral properties of rare earth alkaline earth niobates
Zhang, J., F. Lu and Q. Su 897

The influence of ZnO on the luminescence of $LaOBr:Tb_{0.0075}$
Liu, J., Y.Wu and F.P. Wang 899

Photoluminescence characterization of rare-earth (Er,Yb)-doped InP grown by metalorganic chemical vapor deposition
Takahei, K., K. Uwai and H. Nakagome 901

Transition probabilities in $La(Al,Ga)0_3:Tm^{3+}$
Nieuwesteeg, K.J.B.M., T.G.M. van Rijn, R.A.M. van Ham, D.B.M. Klaassen and C.A.H.A. Mutsaers 903

Photoluminescence properties of diamond-like amorphous carbon films
Fang, R., Y. Song, M. Yang, W. Jiang, K. Yan and H. Wang 905

Evidence from photoluminescence spectra for the formation of extremely low-compensated p- and n-type Ge-doped GaAs grown by molecular beam epitaxy
Makita, Y., M. Mori, H. Tanaka, H. Yokohama, K. Irie, N. Ohnishi and S. Shigetomi 907

A study of a $GaP_{1-x}N_x$ alloy system
Lin, Z., L. Wu, X. Yang, X. Liu and G. Li 909

Preparation of epitaxial GaAs layers for negative electron affinity photocathodes by using the electrical current-induced liquid phase epitaxy
Zeng, Q. and X. Zeng 911

Electronic structure of ZnS, ZnSe and $ZnS_{1-x}Se_x$ using LMTO method
Zeng, X. and M. Huang 913

Spectral structure and valence stability of europium(II) in ARF_4
Shi, C. and Z. Ye 915
